

# Industry-Leading Therapy Outcomes

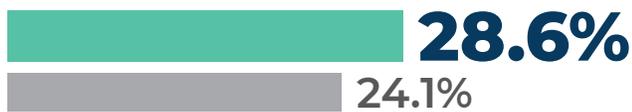

## Stonerise Therapy Performance Data

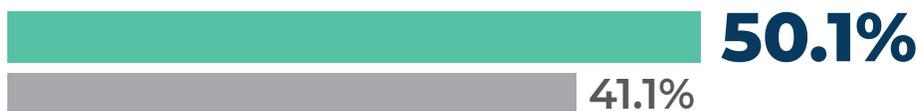

Stonerise Therapy outcomes consistently outperform national averages for physical therapy, occupational therapy and speech-language pathology—three measures that represent the full spectrum of rehabilitation services. Averages shown below take into account both patient progress and the time required to make that progress in short- and long-term care settings.

Mobility/Physical Therapy\*

Self-Care/Occupational Therapy\*

NOMS (National Outcomes Measurement Systems)/Speech Therapy†

■ 2020 Stonerise Therapy Patient Average

■ 2020 National Therapy Patient Average for Transitional and Skilled Nursing Centers

\*Physical Therapy and Occupational Therapy: Continuity Assessment Record and Evaluation (CARE) Item Set, developed for the Post-Acute Care Payment Reform Demonstration (PAC-PRD) and authorized by the Deficit Reduction Act of 2005

†Speech-Language Pathology: Measured by the American Speech-Language-Hearing Association (ASHA)

## Our Collaborative Approach

Stonerise Therapy provides skilled physical, speech, occupational and respiratory therapies in gyms at all 17 Stonerise Transitional Care Centers and in patients' homes through Stonerise Home Health. Our therapy services are part of an overall collaborative treatment model. We are familiar with the health challenges of our region, and our therapy programs start with a standardized assessment to set goals with each patient—resulting in goal-driven, individualized plans designed to help patients get back to health and back to life.

## About Us

The Stonerise Network provides an essential and broad range of transitional care services to patients in West Virginia and southeast Ohio through transitional and skilled nursing care centers, therapy, home health, and hospice.

We offer innovative healthcare solutions to get patients throughout West Virginia and beyond back to health and back to life.
